Buyback And Burn Campaigns

CatSlap Might Be Totally Childish And Stupid, But The Team Certainly Isn't. We're Buying Back SLAP Tokens On The Open Market Every 20 Minutes To Provide Constant Price Support To The Token. We're Not Joking About Sending This To 100M Market Cap, And Much Higher!

In Addition To This, We'd Already Burned Nearly 1 Million Worth Of SLAP Tokens The Last Time This Litepaper Was Last Updated.

\$SLAP Token Burns Take Two Forms:

1. Slap Milestone Burns: 10M, 25M, 100M And More... Every Time The Slapometer's Total Slaps Reach Certain Milestones, We Burn The Corresponding Amount Of Tokens.
2. Early Unstake Burns: Users Who Stake SLAP Vest Their Tokens For A Minimum Of 7 Days. Unstaking Early Burns The Balance Of Tokens That Are Yet To Vest.

Staking: The Longer-Term HODL Strategy

Catslap Token's Utility Keeps On Giving. If You're A Long-Term Believer In SLAP, As You Should Be, You Can Get 40% Fixed APY In Our Staking Contract. This Can Be Accessed Via The Website's Staking Dashboard Or Within Best Wallet, Our Trusted Wallet Partner.

This Facility Allows Catslap Holders To Keep Their Tokens Vested To Receive Passive Rewards. Tokens Are Vested For A Minimum Of 7 Days, However, You Can Withdraw Early By Burning The Balance Of Tokens That Are Yet To Vest. This Forms Part Of Our Burn Campaign.

An Allocation Of 20% Of The Total Token Supply Is Set Aside For Staking Rewards In The Slaonomics.
